Name: _____ Roll No.: _____

CSD208 Computer Architecture
Assignment (Due date: 03/05/19 at 1:00 PM)
Total Marks: 15

1. Explain CM-5 in detail. Refer to the research paper uploaded on Blackboard. [4 Marks]

Name: _____ Roll No.: _____

Name: _____ Roll No.: _____

2. What is Virtualization? Give some examples of virtualization. [4 Marks]

Name: _____ Roll No.: _____

3. Which is the most suitable architecture for FFT computation. Explain how FFT is implemented on this architecture. [2 Marks]

Name: _____ Roll No.: _____

4. [2 Marks]

a. Explain the working of the Physical clock.

b. What are Logical clocks? Explain how can we maintain synchronization in Logical clocks in a distributed environment with the help of suitable examples.

Name: _____ Roll No.: _____

Name: _____ Roll No.: _____

5. How deadlocks happen in distributed architectures? How do you handle deadlocks? Explain Chandi-Misra-Haas algorithm for deadlock detection with the help of an example.
[2 Marks]

Name: _____ Roll No.: _____

6. What is Eventual consistency? Explain the epidemic model. [1 Mark]
