Week	Topic	Topic Area	Assignments and Exams
Jan 7,9	Course Overview, Intro to Security	Introduction/Module on Security	
Jan 14	Cryptography		
Jan 16	Class cancelled	Security Module	
Jan 21, 23	Intrusions, Malware, Email Security	Security Module	Hw 1 out
Jan 28, 30	Web Security, Firewalls, System Admin, Software Security	Security Module	
Feb 4, 6	Intro to Data Mining, Challenges of Security Domain	Data Mining for Security, Why we need Security Analytics?	Hw 1 in, Post Test 1, Quiz 1
Feb 11, 13	Association Rule Mining, Decision Trees, Security Applications	Data Mining for Security	Hw 2 out
Feb 18, 20	Clustering, Anomaly Detection, Security Applications	Data Mining for Security	Hw 2 in
Feb 25, 27	Into to Machine Learning, Naïve Bayes	Machine Learning for Security	Post Test 2, Quiz 2
Mar 10, 12	Spring Break		
Mar 3, 5	Neural Networks, Support Vector Machines, Security Applications	Machine Learning for Security	Hw 3 out
Mar 17, 19	Online learning, semi-supervised learning, One class learning, Security Application	ML for Security	Hw 3 in
Mar 24, 26	ML Wrap Up, Intro to NLP	ML/NLP for security	Post Test 3, Quiz 3
Mar 31, Apr 2	Corpus/WWW based work, Markov Models	NLP for security	Hw 4 out
Apr 7, 9	POS Word Sense tagging, Knowledge bases	NLP for security	Hw 4 in
Apr 14, 16, 21, 23	Security Applications of NLP, Adversarial Machine Learning	NLP for security	Post Test 4, Quiz 4 on 23rd
Apr 28, 2-5pm	Project – Poster Session	Security Analytics
