PROJECT Synopsis CSD428, Spring 2020

Group No. : ***TBD***

Group Name : ***Kryptonite***

Title of the Project : **Interactive map application for real time crime reporting**

Platform/Tools to be Used: ***Android Studio, Google Maps API***

Project Synopsis :

Interactive & user-friendly map application for the public to inform nearby police stations and PCR vans about the crimes and emergencies in real time. The map also shows locations of crimes and emergencies happening around the user in real-time. An additional feature is that the live location of PCR vans nearby will be available on the app so that the user can reach out to it in case of an emergency. An SOS alarm and a SOS flashlight pattern will also be flashed as an additional optional feature. The location and an SOS message are also sent to emergency contacts.

High Level Solution:

The application is connected to Google maps API which will allow the person to put/pin their live locations on the map. In a moment of distress, with the help of an easy to use widget, an SOS call will be sent to the emergency contacts listed and will also put the victim's location on the map. SOS calls will also be automatically transmitted to the nearby police stations. People nearby can then see that pin location and go help.

The app will allow police patrol vehicles to pin their location on it. Furthermore, the app will send out alerts as soon as any police patrol vehicle is within 200 meters from the user's location and the map will also shows them an optimized way to the vehicle. This ensures that if the user is in grave danger, they can find a way to the police as soon as possible.

PROJECT Synopsis CSD428, Spring 2020

Team:

Sr.No.	***Roll No.***	***Student Name***	***Role (****Scrum Master, Product Owner, Developer, QA, DevOps)*	***Role Description***
1.	*1710110097*	*Daniel David Vaz*	*Developer*	*Researching, designing, implementing and managing software programs. Testing and evaluating new programs.*
2.	*1710110165*	*Kabir Kanha Arora*	*QA*	*Reviewing quality specifications and technical design documents to provide timely and meaningful feedback. Creating detailed, comprehensive and well-structured test plans and test cases. Estimating, prioritizing, planning and coordinating quality testing activities.*
3.	*1710110183*	*Komal Talwar*	*Scrum Master*	*Monitoring the scrum processes and scrum meetings, increasing team efficiency, motivating the team, suggesting changes that will ensure quality and timeliness*
4.	*1710110202*	*Manika Mittal*	*Developer*	*Researching, designing, implementing and managing software programs. Testing and evaluating new programs*
5.	*1710110309*	*Shivangi Goel*	*Product Owner*	*Responsible for setting, prioritizing, and accepting the work generated by a team in order to ensure the most valuable and proper functionality of the product.*
6.	*1710110366*	*V. Pratishtha Sharma*	*DevOps*	*Collaborate with software developers, system operators and other IT staff members to manage code releases.*
